Due to tremendous growth, TECH-SONIC is looking for highly skilled individuals to join our team.

Job Title: Software Programmer

Position : Full time - Monday through Friday, 8:30 – 5:00

Contact: Email hyun@techsonicultrasonic.com with resume

Position Summary: Under general direction from the Senior Software Engineer, the Software Programmer will design, write, update, and maintain software for supervisor management of networked machines, machine operator interfaces, and PLC level control of ultrasonic wire bonders.

Tech-Sonic is a rapidly growing designer and manufacturer of ultrasonic metal welding equipment for the electrical and refrigeration industries. We manufacture and assemble in the U.S., Philippines and China and serve customers around the globe. The potential for company growth is huge so we are looking for individuals that have the drive and passion to grow with us and become the foundation of our success.

About the Software Programmer:

At this time, we are looking to fill our Software Programmer role with a programmer who will be working with the design, coding, and testing of PLC control software to operate high tech capital equipment for ultrasonic welding, design and implement C# based operator interfaces, and design and code TCP/IP network supervisor management stations. Applicants must be capable of interpreting mechanical/electrical drawings, be capable of designing, implementing, and testing of plant level and machine level operator interfaces, with database support for production scheduling and statistical analysis of the production history.

Position Qualifications:

- Experience with the Microsoft .Net programming environment.
- Experience with C# programming for Windows CE and Windows Embedded Standard.
- Experience with Microsoft SQL and DataSets.
- Experience in PLC programming.
- Good written and oral communication skills.
- Ability to read and understand CAD mechanical and electrical drawings.
- Ability to prioritize, organize and complete tasks independently.
- Ability to communicate effectively and work cooperatively with staff.
- High degree of personal initiative.
- Ability to work under pressure in a fast-paced environment.
- Ability to manage, prioritize and balance multiple tasks.
- Must be flexible, able to adjust schedule.

Education and Experience Requirements:

- Must have AS or 4+ years working in manufacturing environment.

We offer a friendly work environment with benefits including medical insurance, paid vacation/holidays.

Eligible applicants, please email hyun@techsonicultrasonic.com with resume.
